
USDA to Open General and Continuous Conservation Reserve Program Enrollment for 2025

News Release | May 12, 2025

[View PDF](#)

WASHINGTON, May 12, 2025 – The U.S. Department of Agriculture (USDA) today announced several Conservation Reserve Program (CRP) enrollment opportunities for agricultural producers and landowners. USDA’s Farm Service Agency (FSA) is accepting offers for both the General and Continuous CRP beginning today through June 6, 2025.

CRP, USDA’s flagship conservation program, celebrates its 40th anniversary this year. For four decades, CRP has provided financial and technical support to agricultural producers and landowners who place unproductive or marginal cropland under contract for 10-15 years and who agree to voluntarily convert the land to beneficial vegetative cover to improve water quality, prevent soil erosion and support wildlife habitat. The *American Relief Act, 2025*, extended provisions for CRP through Sept. 30, 2025.

“With 1.8 million acres available for all CRP enrollment this fiscal year, we are very aware that we are bumping up against the 27-million-acre statutory cap,” said FSA Administrator Bill Beam. “Now more than ever, it’s important that the acres offered by landowners and those approved by USDA address our most critical natural resource concerns. With the limited number of acres that we have available, we’re not necessarily looking for the most acres offered but instead prioritizing mindful conservation efforts to ensure we maximize the return on our investment from both a conservation and economic perspective.”

General CRP (Signup 64)?

Agricultural producers and landowners submit offers for General CRP through a competitive bid process. Offers are ranked and scored, by FSA, using nationally established environmental benefits criteria. USDA will announce accepted offers once ranking and scoring for all offers is completed. In addition to annual rental payments, approved General CRP participants may also be eligible for cost-share assistance to establish long-term, resource-conserving vegetative cover.

Continuous CRP (Signup 63)

Unlike General CRP, Continuous CRP offers are not subject to a competitive bid process. To ensure enrolled acres do not exceed the current statutory cap of 27 million acres, FSA is accepting Continuous CRP offers on a first-come, first-served basis through June 6. However, should allotted CRP acreage remain available following the June 6 deadline, FSA will accept continuous CRP offers from interested landowners through July 31, 2025, and may be subsequently considered for acceptance, in batches, if it's determined that the offered acres support USDA's conservation priorities.

Continuous CRP participants voluntarily offer environmentally sensitive lands, typically smaller parcels than offered through General CRP including wetlands, riparian buffers, and varying wildlife habitats. In return, they receive annual rental payments and cost-share assistance to establish long-term, resource-conserving vegetative cover.

Continuous CRP enrollment options include:

- **State Acres for Wildlife Enhancement Initiative**: Restores vital habitat in order to meet high-priority state wildlife conservation goals.
- **Highly Erodible Land Initiative**: Producers and landowners can enroll in CRP to establish long-term cover on highly erodible cropland that has a weighted erodibility index greater than or equal to 20.
- **Clean Lakes, Estuaries and Rivers (CLEAR) Initiative**: Prioritizes water quality practices on the land that, if enrolled, will help reduce sediment loadings, nutrient loadings, and harmful algal blooms. The vegetative covers also contribute to increased wildlife populations.
- **CLEAR30 (a component of the CLEAR Initiative)**: Offers additional incentives for water quality practice adoption and can be accessed in 30-year contracts.
- **Conservation Reserve Enhancement Program**: Addresses high priority conservation objectives of states and Tribal governments on agricultural lands in specific geographic areas.

Grassland and Expiring CRP Acres

FSA will announce dates for Grassland CRP signup in the near future.

Additionally, landowners with acres enrolled in CRP set to expire Sept. 30, 2025, can offer acres for re-enrollment beginning today. A producer can offer to enroll new acres into CRP and also offer to re-enroll any acres expiring Sept. 30, 2025.

For more information on CRP participant and land eligibility, approved conservation practices and detailed program fact sheets, visit FSA's [CRP webpage](#).

More Information?

Interested producers should apply through the FSA at their local [USDA Service Center](#).

Signed into law in 1985, CRP is one of the largest voluntary private-lands conservation programs in the United States. Originally intended to primarily control soil erosion and potentially stabilize commodity prices by taking marginal lands out of production, the program has evolved over the years, providing many conservation and economic benefits.???

FSA helps America's farmers, ranchers and forest landowners invest in, improve, protect and expand their agricultural operations through the delivery of agricultural programs for all Americans. FSA implements agricultural policy, administers credit and loan programs, and manages conservation, commodity, disaster recovery and marketing programs through a national network of state and county offices and locally elected county committees.
